

Device  
Boss

An MDM  
Solution

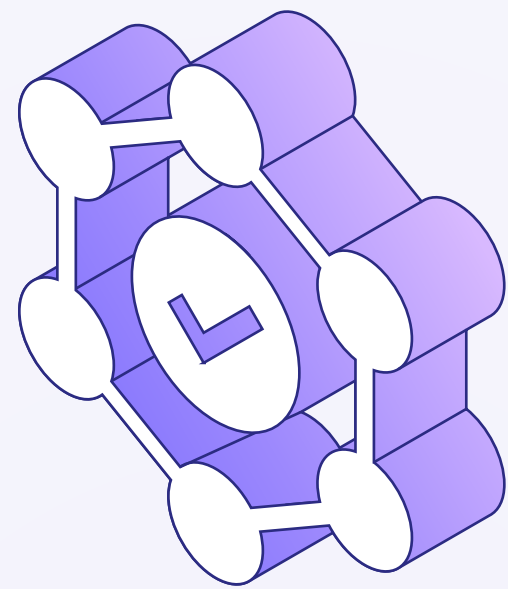

# Total Control. Zero Blind Spots.

Comprehensive Mobile Device Management  
for Modern Enterprises

# Why Our MDM Solution?

03

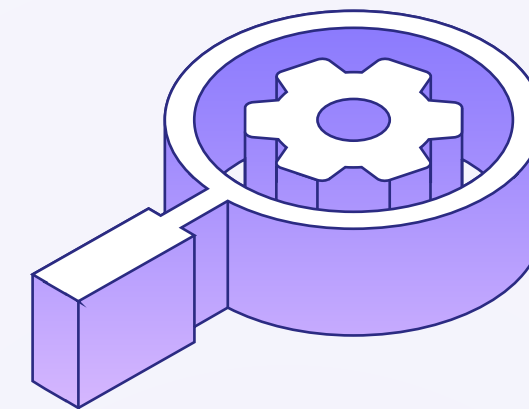

## Endpoint Visibility

Manage all your mobile, desktop, Servers and IoT devices from one dashboard.

## Secure & Complaint

Enterprise-grade security to protect your data and ensure compliance.

## Remote Monitoring

Support, monitor, and control devices without physical presence.

# Key Features

04

## Effortless Device Onboarding

Quickly onboard devices with zero-touch operations and streamline your deployment process.

## Visibility, Monitoring & Control

Monitor device health, usage, and security remotely, and provide instant support.

## Seamless User Onboarding

Onboard users easily with role-based configurations tailored to departments, teams, or job functions.

## Security & Audit Friendly compliance

Enforce security policies, manage updates, and ensure regulatory compliance across all endpoints.

## Near Real time Alerts & Analytics

Actionable insights with near real-time reports and alerts to optimize performance and security.

## Run Time Application Management

Deploy, update, and manage business-critical apps across your device fleet remotely with full runtime control and whitelisting

# Why you truly need MDM?

05

## Password policies

Ensure users create strong passwords.

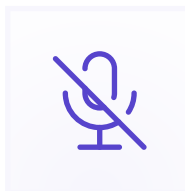

## Disk encryption configurations

Protect data in the event of a lost or stolen device.

## Wipe the device remotely

If the data falls into the wrong hands, it won't be compromised.

## Hardware Restrictions

Restrict hardware functions to meet legal / privacy requirements.

## App Forced Update

Silent installation and updates.

## Configure Network

Configure wireless credentials, VPN, proxy, and additional settings.

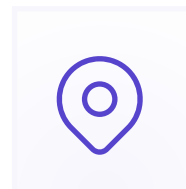

## Allow/deny web filtering

Restrict access to undesirable websites for productivity.

## Manage OS Updates

Enforce OS updates to prevent security breaches on devices.

## Geolocation & App activity

Track device locations and monitor app usage across the fleet.

## Manage company assets

Easily keep device assignments updated from a central location.

## macOS Self-Service Scripts

An app and resources catalog is a tap away for employees.

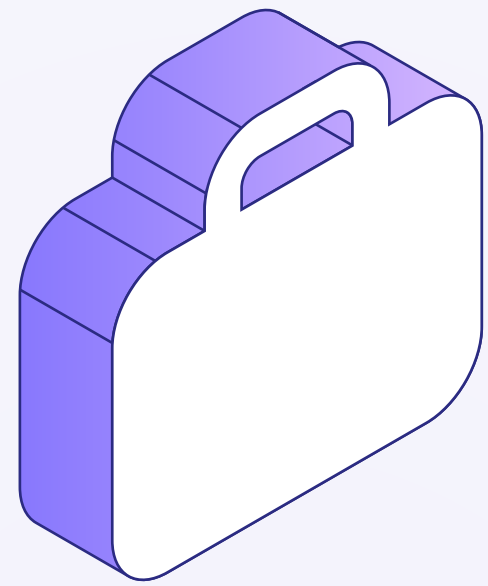

## SSO User identity

On device authentication seamlessly integrated with SSO.

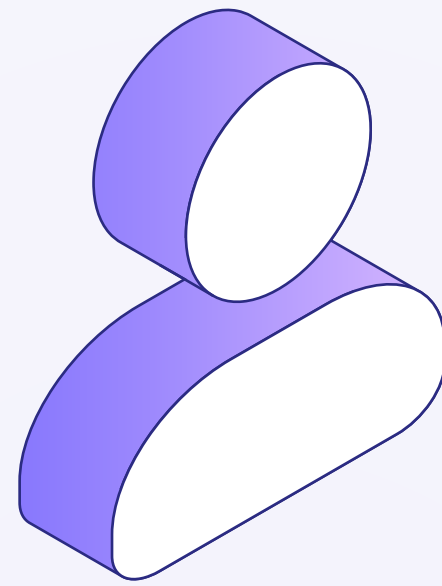

# 3 Key Operating Modes

06

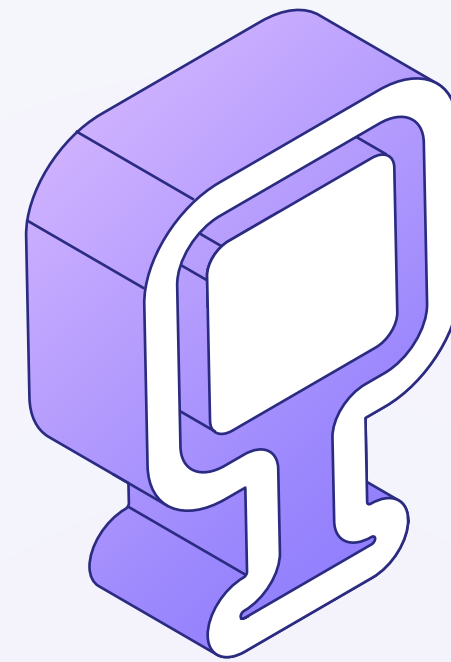

## Corporate-owned devices

- Dedicated
- Fully managed
- Supervised

## User-owned devices

- BYOD / CYOD
- Personal use
- Supervised

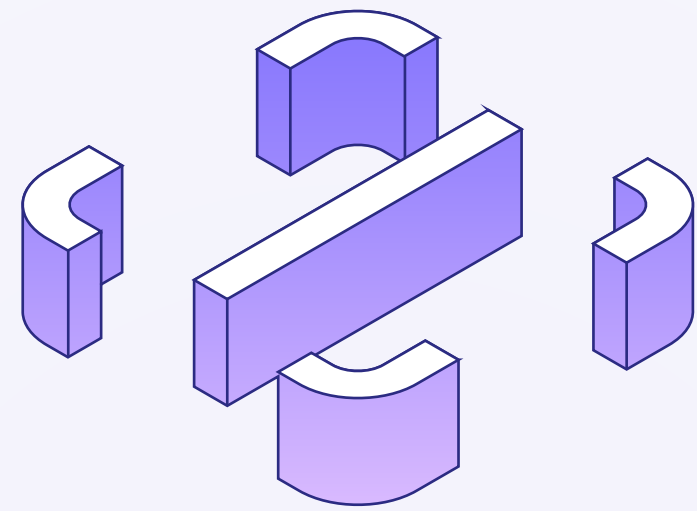

## Dedicated devices

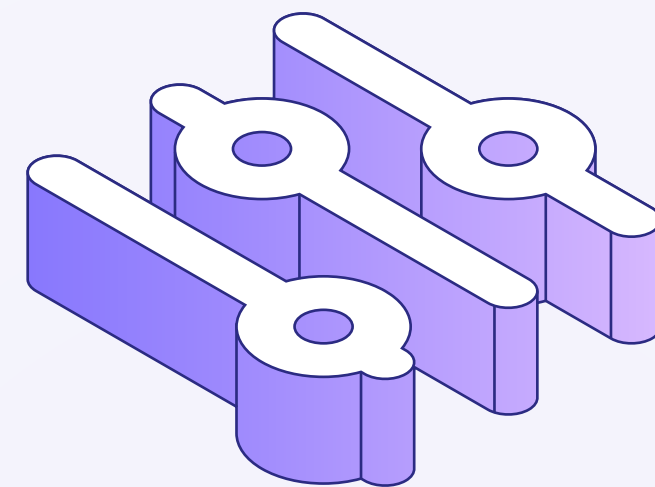

- Kiosk mode PoS
- Digital signage
- Totems
